PROFESSIONAL SUMMARY

Full-stack software engineer with hands-on experience designing, building, and deploying production-grade systems. Built a digital wallet platform end-to-end: a secure REST API backend with JWT authentication, KYC-based access control, and append-only ledger design using Spring Boot and PostgreSQL, paired with a complete multi-page web frontend. Comfortable across the full stack, from schema design and API architecture to deployment and documentation.

EDUCATION

San Francisco State University
Bachelor of Science in Computer Science. GPA: 3.80. *December 2027*

EXPERIENCE

IT Technician April 2023 – December 2024
MSJ Bureau De Change Ltd *The Gambia*

- Resolved an average of 20 support requests per week across computer systems and infrastructure, supporting a user base of 50+ staff
- Performed routine system checks and maintenance to prevent disruptions, demonstrating reliability and attention to detail

Cashier August 2022 – March 2023
MSJ Bureau De Change Ltd *The Gambia*

- Delivered customer service in a fast-paced environment, maintaining accuracy and professionalism under pressure
- Processed high-volume transactions while consistently meeting compliance and operational standards

PROJECTS

Digital Wallet Platform https://linkcoreweb.netlify.app February 2026 – Present
Personal Project

- Architected and deployed a production REST API across 19 endpoints for secure peer-to-peer transfers with JWT authentication and KYC-based access control, restricting high-value transactions (>=$75,000) to verified users only
- Designed an append-only ledger with PostgreSQL transactional guarantees to ensure consistency and auditability; integrated live FX APIs for real-time multi-currency conversion with a pre-confirmation quote endpoint
- Built a complete multi-page frontend covering the full user journey: multi-step registration with OTP email verification, JWT session management, live-quote transfer flow, transaction history, deposit/withdrawal, and profile management
- Deployed backend on Render with managed PostgreSQL (Neon) and frontend on Netlify; documented all 19 API endpoints with Swagger/OpenAPI

SKILLS

Languages: Java, JavaScript, TypeScript

Backend: Spring Boot, REST API Design, Spring Security, JWT Authentication, JPA/Hibernate, Flyway

Database: PostgreSQL, Relational schema design, Data validation, Transactional consistency

Frontend: HTML, Tailwind CSS, Vanilla JavaScript, Multi-page flows, Session management, API integration

Tools: Docker, Git, GitHub, CI/CD, Swagger/OpenAPI, Render, Neon, Netlify

API Integration: ExchangeRate API, RESTful third-party service consumption
